

FAISEL TAJIRAN

FORWARD DEPLOYED ENGINEER · APPLIED & AGENTIC AI

832-928-1561 · faisel@faiseltajiran.com · faiseltajiran.com · linkedin.com/in/faiseltajiran · Houston, TX · Open to remote & client-site travel

PROFESSIONAL SUMMARY

Engineer-operator who embeds inside real businesses, consults with decision-makers in their own language, and ships production AI they pay for. 15+ years working directly with owners and executives across hospitality, travel, enterprise marketing, medical imaging, and fintech — first as the growth strategist who learned each business from the inside, now as the engineer who builds the systems. Founder of **Frequentor**, a hospitality intelligence platform with **9 U.S. provisional patents filed**, a shipped iOS/Android app, an AWS serverless backend, custom sensor hardware, and a fine-tuned agentic LLM at **99% on a 410-test eval battery** — every layer built solo. Currently deploying an **owner-funded agentic voice-AI platform** inside a 40-year travel company: mined 3,200 of its recorded calls into training data, reverse-engineered its booking API, and shipped AI agents for its live phone lines. Full ML lifecycle depth (dataset → fine-tune → evals → serving), Anthropic Claude API + MCP, deep AWS. MBA.

CORE COMPETENCIES

Agentic AI & LLM Engineering: Anthropic Claude API, Model Context Protocol (MCP), AWS Bedrock, multi-agent orchestration, tool use / function calling, agentic voice AI (ElevenLabs ConvAI), prompt engineering, eval-harness design, anti-hallucination architecture, AI moderation pipelines

Applied ML: LoRA/QLoRA fine-tuning (PyTorch, Unsloth, TRL/PEFT), instruction-dataset engineering (12,441 pairs), GGUF quantization & llama.cpp serving, Azure AI Foundry, H100 cloud training, token-level regression forensics

Full-Stack Engineering: TypeScript, Node.js / Express, Python, React / Next.js, React Native / Expo (iOS + Android), GraphQL, Postgres / Supabase (row-level security), Prisma, DynamoDB single-table design

Cloud & Infrastructure: AWS Amplify Gen 2, AppSync, Cognito, Lambda, S3, least-privilege IAM, CloudFormation / CDK, serverless & event-driven architecture, Cloudflare, CI/CD, Render / Netlify / Vercel

Field Integration: reverse-engineering vendor APIs (Swagger), HMAC-verified webhooks, OAuth, telephony (RingCentral, Twilio), CRM (GoHighLevel, HubSpot), Stripe, Playwright automation, legacy-system bridging

Hardware & Edge: ESP32 firmware (Embedded C/C++), mmWave radar + thermal IR + WiFi RSSI sensor fusion, BLE iBeacon, real-time edge processing, 3D CAD / enclosure design

Business & Consulting: executive stakeholder management, ROI modeling & business-case design, founder-led sales, 15 years paid media & analytics (multi-million-dollar budgets), USPTO patent strategy, MBA

PROFESSIONAL EXPERIENCE

Founder — Frequentor

Houston, TX · 2025 – Present

Hospitality intelligence platform connecting guests, staff, and owners through verified physical-presence signals. Sole engineer, designer, and operator across mobile, cloud, hardware, AI, and go-to-market.

- **Agentic AI — FAHE:** Built a proprietary hospitality LLM end-to-end: 40+ fine-tune iterations (Mistral-7B LoRA/QLoRA locally; Llama-3.3-70B QLoRA on Lambda H100s and Azure AI Foundry with AWS Bedrock custom-model import), a hand-built 12,441-pair instruction dataset, and a 410-test decision-grade eval battery. Reached **99% (404/410)** by engineering an inference-layer output sanitizer rather than training a 45th version — then wired five live agentic tools (AppSync/Lambda) and an ElevenLabs voice layer at ~593 ms to first audio.
- **Intellectual property:** Filed **9 U.S. provisional patents** covering geofence silent check-in, multi-signal presence verification, occupancy-driven rewards, verified-content authority, agentic forecasting, cross-venue behavioral-graph intelligence, and portable attendance attestation. Prior-art research and the USPTO filing process handled personally.
- **Mobile:** Designed and shipped a 460+ file React Native / Expo app — background geofencing, APNs push, Apple Wallet passes, lock-screen widgets, EAS OTA delivery; live on TestFlight with multi-device field validation.
- **Cloud:** AWS Amplify Gen 2 backend — AppSync GraphQL with live subscriptions, DynamoDB single-table + GSIs, dual-mode Cognito under least-privilege IAM, Lambda, S3 media pipelines; production user pool serving live traffic.
- **Hardware:** ESP32 sensor pucks fusing mmWave radar, thermal IR, and promiscuous-mode WiFi RSSI into a real-time busyness score; CAD-designed, 3D-printed enclosures; full sensing→cloud→app chain validated live at a Houston venue.
- **Traction:** Founder-led pilot pipeline across Houston venues; backed by AWS Activate, NVIDIA Inception, ElevenLabs (33M credits), Lambda, DigitalOcean Hatch, PostHog, Stripe Startups, and the Anthropic Builder program.

Professional Travel Center / eTotalHome

Houston, TX · June 2010 – Present

A 16-year embedded engagement — the forward-deployed arc in one company: learned the business from the inside as its digital-marketing lead, identified the operational bottleneck worth automating, sold ownership the fix in ROI terms, then engineered and shipped it as a funded build.

Embedded AI & Automation Engineer · 2025 – Present

- **AI Phone Operator (greenlit & funded by ownership):** Agentic voice platform answering the live marketing line 24/7 — ElevenLabs ConvAI agents fronted by RingCentral routing, booking real appointments into the company's fulfillment system through an API client reverse-engineered from its Swagger spec. Express/TypeScript tool endpoints, HMAC-verified post-call webhooks, session capacity enforced atomically in Postgres — never trusted to the agent prompt.
- **Training data mined from the field:** Built a Playwright harvester over the company's call-tracking system and mined ~3,200 recorded operator calls with outcome labels; read 79 transcripts line-by-line to extract the script as top performers actually run it. Established the **42% human booking baseline** the AI is benchmarked against; the distilled coaching card now trains the human operators too.
- **Isolation by architecture:** Owner's hard rule — prospect and member data never touch. Two separate Supabase projects with separate credentials, row-level security, and dashboard route guards. Next.js dashboard with per-role queues, transcript/audio playback, and an owner-facing ROI report; second agent role (24/7 member-request CSR with pre-fetched deal research) shipped first as MVP.

- **GHLxRC Bridge (deployed):** Bidirectional SMS/MMS bridge between RingCentral and GoHighLevel — five Netlify serverless functions, webhook validation handshakes, contact upsert and conversation threading, keyword-triggered campaign MMS; four shipped revisions in production use.
- **Growth engineering:** Three-variant A/B landing system with a branching qualification survey wired to CRM (TCPA-compliant), and a Remotion pipeline rendering 12 vertical video-ad variants as parameterized React code.

Digital Marketing Director · June 2010 – Present

- Own all digital marketing for the company — paid media (Google/Meta), SEO, lifecycle email, brand sites and portals — leading a six-person inbound team.
- Automated lead engagement with Zapier + BurstSMS APIs: conversion rates up **60%**, manual workload down **40%**; renewal-program overhaul drove a **6,500%** increase in monthly renewals and ~\$300,000 added annual revenue.
- Pilot campaign for a new service line returned **400% ROI** and **\$120,000** in revenue.

Digital Marketing Strategy Manager — Landry's Inc.

Houston, TX · Oct 2022 – Aug 2023

- Led digital advertising for one of the country's largest hospitality conglomerates (**600+ properties, 60+ brands**): +25% lead generation, –15% cost-per-acquisition; media buying across CTV, programmatic video, and audio.
- Implemented event and conversion tracking (Google Tag Manager / Analytics) across **500+ locations**; presented quarterly analytics to the VP of Marketing using Looker and Supermetrics.
- Built and delivered the Universal Analytics → GA4 migration training program covering **90+ brands**, improving data accuracy 30%.

SELECTED DEPLOYMENTS ACROSS INDUSTRIES — full case studies at faiseltajiran.com/work

- **Veridose (radiation oncology):** nnU-Net auto-contouring API with GPU inference on real CT data, in-browser 3D multiplanar medical viewer (NiiVue), and a hash-chained physicist attestation ledger — co-founded with a board-certified medical physicist.
- **Authyr (trust infrastructure):** Cryptographic evidence layer for consumer-service disputes — append-only ed25519 hash chains with offline third-party verification, crypto-agile key rotation, Amplify Gen 2 backend; own USPTO provisional filed.
- **This Is Credit (consumer fintech):** Three-bureau credit platform behind a swap-one-file vendor abstraction; hand-rolled accessible SVG data-viz; FCRA/CROA/GLBA compliance mapped before any consumer data.
- **Client platforms (AliTheRep, Newspeed):** Full-cycle client delivery — design systems, Remotion motion engineering, deploy automation — shipped live on client domains against stakeholder feedback.

PATENTS — 9 U.S. PROVISIONALS FILED (USPTO)

- **PPA #1–4** — App 64/035,536 · 64/035,553 · 64/035,564 · 64/035,584, filed 2026-04-10 — geofence silent-check-in loyalty; multi-signal presence verification; staff-guest connection; occupancy-driven dynamic rewards
- **PPA #5** — App 64/049,701, filed 2026-04-26 — verified-attendance content authority & bilateral attribution
- **PPA #6** — App 64/053,550, filed 2026-04-30 — autonomous hospitality operations via multi-signal behavioral-graph fusion with agentic AI orchestration (FAHE)
- **PPA #13** — App 64/057,597, filed 2026-05-05 — cross-venue customer behavioral-graph competitive intelligence
- **PPA #15** — App 64/069,208, filed 2026-05-19 — B2B supplier-rep territory & promotion activation
- **Authyr PPA #1** — App 64/069,215, filed 2026-05-19 — tier-based portable physical-attendance attestation with cryptographically anchored verification receipts

EDUCATION & CERTIFICATIONS

Master of Business Administration — University of Houston	2012 – 2015
Bachelor of Business Administration — University of Houston	2004 – 2010
Google Generative AI Fundamentals · Google Ads Search · Google Analytics IQ · HubSpot Digital Marketing · Meta Certified Marketing Strategy Professional
